Aspiring UI/UX Designer and current Computer Science student at Binus University. Dedicated to crafting intuitive user experiences through data-driven design and user-centric problem solving. Proficient in standard design tools (Figma, Adobe XD) with a fundamental understanding of front-end development (HTML/CSS), allowing for effective collaboration with engineering teams.

Education Level

Universitas Bina Nusantara - Bandung

Sep 2023 - Mar 2027 (Expected)

Undergraduate Computer Science, 3.26/4.00

- Taking the Interactive & User Experience Design specialization at BINUS Kemanggis as part of the mobility program from BINUS.

Organisational Experience

BINUS - Bandung

Jul 2024 - Sep 2024

Freshmen Leader

- As a dedicated Freshmen Leader and mentor at Binus University, my role centered on improving the user experience for incoming students. I successfully guided a cohort of 10 freshmen through their critical transition period, proactively addressing common pain points related to academic scheduling, course registration, and social integration. This experience was rooted in empathy and user advocacy, requiring me to practice active listening to discern student needs and translate complex university policies into clear, easily digestible instructions. By organizing targeted guidance sessions, I effectively mitigated anxiety and reduced information overload, demonstrating strong communication and problem-solving abilities.

Skills, Achievements & Other Experience

- **Projects** (2025): Health Assessment Platform (HabitScore) Technologies: Laravel 11, Bootstrap 5, Vanilla JavaScript, Custom CSS/SASS, Git/GitHub Front-End Engineering: Designed and implemented the complete, responsive UI using Bootstrap 5 and custom CSS, ensuring mobile-first compatibility and seamless cross-browser performance. Interaction Design: Developed a dynamic, state-managed 10-step quiz engine using Vanilla JavaScript to guide the user journey, minimizing friction and providing instant visual feedback (e.g., real-time progress bar). Data Visualization: Created an actionable Results Dashboard that uses progress bars and scorecards to visualize user health data across 5 pillars, turning complex inputs into clear, prioritized recommendations. Deployment & Maintenance: Managed the full product lifecycle from coding to deployment via Railway, including database setup (MySQL) and configuration of environment variables to ensure secure HTTPS operation.
- **Projects** (2025): Conceptualizing Tokyoji, a prototype streetwear brand designed to merge Japanese urban aesthetics with local creativity. The project targets the 16–30 demographic by addressing the market gap for high-quality, affordable local alternatives to international labels. Currently developing the visual identity and product prototypes—including hoodies, jackets, and tote bags—focused on exclusive designs and premium material selection.
- **Soft Skills**: Open-mindedness, Active Listening, Articulating Design Decisions, Storytelling, Receiving Feedback, Giving Feedback, Adaptability, Curiosity, Time Management, Attention to Detail, Patience
- **Hard Skills**: Figma, Adobe Illustrator, Photoshop, Laravel, PHP, Composer, Bootstrap, HTML, CSS, Javascript, Railway, Git, GitHub, SQL,
